

A New Chapter for MAP

International Mint and Print announces the 8th MAP Conference as a forward-looking meeting point for the currency ecosystem. Rather than focusing solely on established practices, this edition examines how the industry is adapting—technologically, operationally, and strategically—to a changing global landscape. It brings together those shaping the future of cash and its alternatives in an environment built for direct exchange, practical insight, and high-level networking. Participation remains intentionally limited to preserve the depth and quality of interaction.

An Ecosystem, Not an Audience

MAP is a non conventional conference—it is a working environment where the full currency chain is present. From central banks and issuing authorities to technology providers, security experts, minting institutions, and government stakeholders, the event creates direct alignment between those who define strategy and those who execute it. The result is faster dialogue, clearer decisions, and stronger partnerships.

Focus Areas

The 8th MAP Conference is structured around key industry dimensions:

- **Design to Circulation:** from concept creation and origination to printing, minting, and real-world deployment
- **Trust & Security:** next-generation anti-counterfeiting measures and durability strategies
- **Operational Efficiency:** cash processing, lifecycle optimization, and cost control
- **Digital Convergence:** reshaping the role of central banks and how value is issued, distributed, and perceived, with the emerging challenges in public trust, communication, and data management
- **Materials & Value:** innovation in substrates, metals, and sustainability considerations
- **Public Interface:** communication, transparency, and how institutions engage with users

 **Date:** 08 - 11 November 2027  **Venue:** Istanbul , Turkey
